

A silver car is shown from a front-quarter perspective, moving through a car wash. Large, dense red brushes are visible on both sides of the car, creating a sense of motion and cleaning. The car's surface is wet and glistening. The license plate is partially visible, showing a blue background with a white letter 'E'.

ROLLOVERS

M1 8+

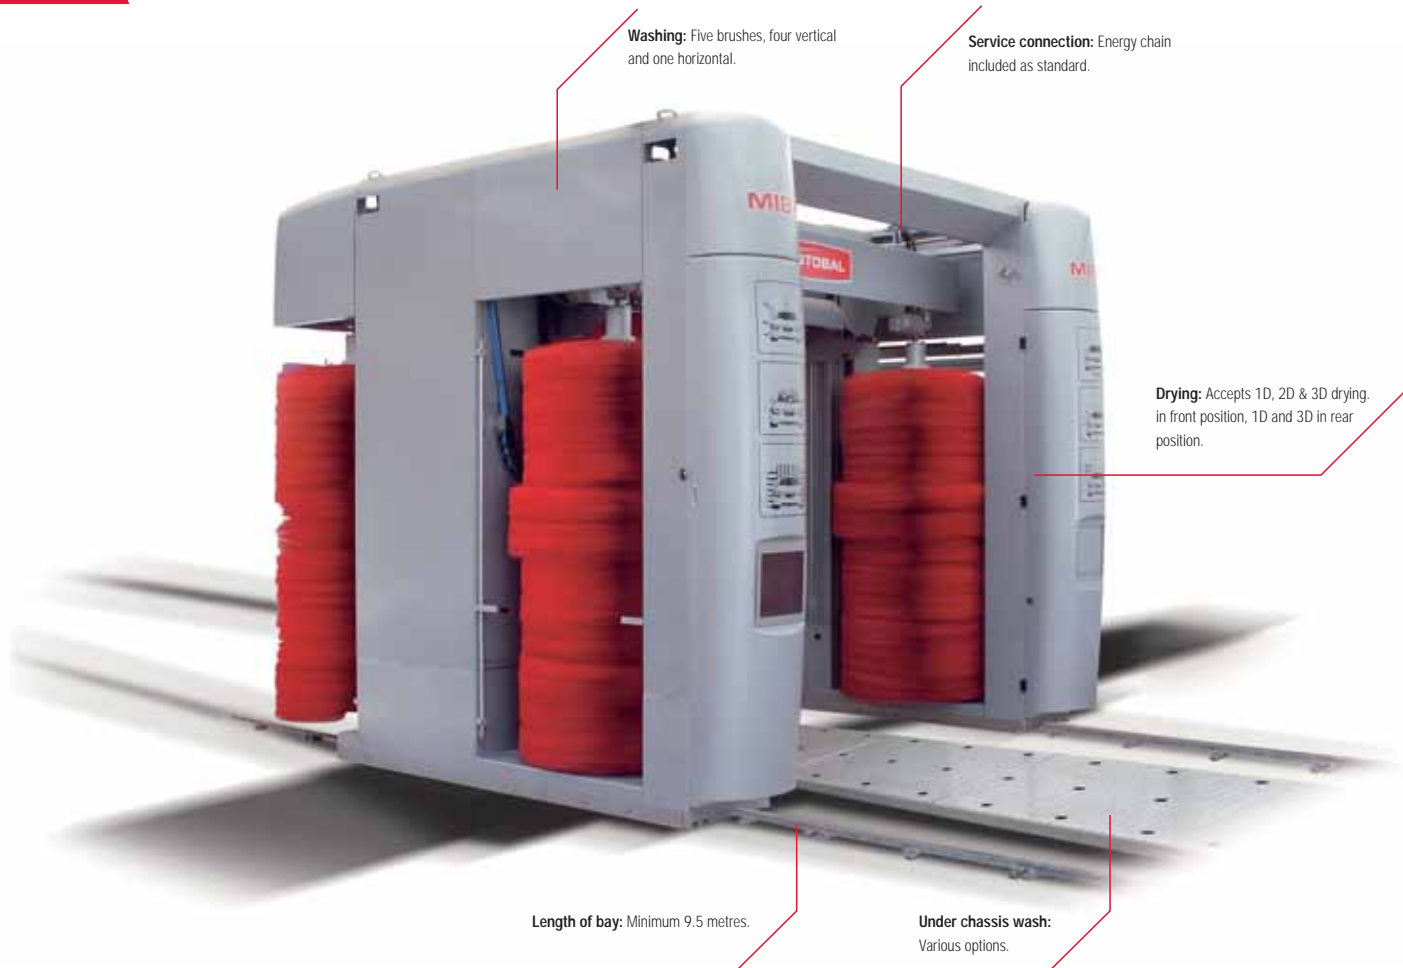

Maximum efficiency in the least time

TOP QUALITY
WASHING AND
DRYING
2.5 MINUTES

If speed is your goal, we have the solution: the M18+, the fastest rollover in the Plus Range, thanks to its five brushes, four vertical and one horizontal. A rollover giving a high quality wash and dry in only 2.5 minutes.

Its secret is that two of its vertical brushes tilt, to adapt better to the side areas of the vehicle, and the horizontal brush traces perfectly around the vehicle's contours.

The M18+ is an easy choice since it can be installed on any rollover bay 9.5m or 10.5m in long and 2.70m high.

RANGE	Vehicle access in meters			Recommended bay			rollover travel m/minute	Dryer Power in kW.	Cars/hour	Model
	Height	Width	Length	Height	Width	Length				
M18+	2,3	2,35	5,20	3,1	4,6	9,5	5-16	8 - 30,4	12-24	4PH2300 <input type="checkbox"/> <input type="checkbox"/>
M18+	2,7	2,35	6,20	3,5	4,6	10,5	5-16	8 - 30,4	12-24	4PH2500 <input type="checkbox"/> <input type="checkbox"/>
